About Sathyam

Founded by the management team of Sathyam Grand Resorts, SIIHM focuses to bridge the gap between the demand and supply in the hospitality industry. We provide state-of-the-art amenities and infrastructure for the students to pursue their passion for learning.

Our intention is to make a world-class facility available for all. We provide a plethora of opportunities for the all-around development of the students including on-site training, seminar, talks, workshops and placement opportunities for a fulfilling future.

Director’s Message

Life poses innumerable challenges and the goal of education is to help one to successfully brave through the rough seas of struggle, strife and hurdles. The strength of character developed in this college holds good for the rest of one’s life. A student is made to blossom intellectually, morally and spiritually.

My congratulations, to the students who have allowed themselves to be shaped especially at the present time when they face the challenge of a rapidly transforming world.

I entreat the Almighty to shower His blessings in plenty upon the staff and students of the college in their efforts.

Principal Message

Education should spread light within and without, instil awareness and strengthen the deep bond between the student and his nation, the world, his fellow human beings and other creatures

True meaning of the word education
Many of you may know that the true meaning of the word “education” is to bring out what is within us. Education is that which enables one to bring out one’s hidden talents. We all have many talents, but we are usually unaware of them. The porter uses his head to earn a living by carrying loads, while the scientist uses his head to make remarkable discoveries and inventions. Similarly, we all have infinite power hidden within us. It is just that most of us are unaware of its existence.

There are five goals that should be sought through education:

- To earn a living—the knowledge and skills needed to gain wealth, position and comfort.
- To recognise that mental health—the maturity to control our thoughts and emotions– is just as important as physical health and to attain that maturity as well.
- The training to do one’s duty to repay one’s debt to one’s home and family as well as to Mother Nature, who has compassionately blessed us with food, shelter, sunshine, rain, the hills, forests, rivers, trees and fruits.
- The inspiration to have gratitude, love and respect towards God and Mother Nature, and the motivation to engage in social work and selfless service born out of that gratitude.
- To awaken the awareness of our Inner Self and to understand, “I am not a separate entity. Rather, I am a part of this universe. Just as the water in the waves reaching the shores and the water in the middle of the ocean is the same, I am one with the whole of creation.”
